

In this section of your portfolio you should include:

1. Document your annelid dissection. Include labeled photos of your earthworm dissection and the sandworm. Answer the lab questions in this section.
2. Document your mollusk dissection. Answer the lab questions in this section.
3. Document your arthropod dissection. Include labeled photos of your crayfish dissection. Answer the lab questions in this section.
4. Document your echinoderm dissection. Include labeled photos of your sea star dissection. Answer the lab questions in this section.

*** A good way to answer the questions would be to type out the question in one colour (or cut and paste it from the squid dissection file on the class website), then answer the question in another colour. ***

The section is due: _____ *(this is also the test date!!)*

Marking:

- Completion of the required items: /3
- Depth of knowledge: /5
- Quality of the work: /2

TOTAL: /10
